

Shelter Shutters™ *Revolutionary New Door Glass Covers*

Shelter Shutters are made to quickly cover and uncover your door and sidelight glass

SECURE AND SAFE

Shelter Shutters are made from super tough fire-rated, corrugated vinyl. We use tamper-proof magnets to hold the shutter in both open and closed positions even after thousands of uses. Ideal for doors with a steel frame surrounding the glass!

WORKS ON METAL & "ALL WOOD" DOORS!

Doors with a steel frame around the glass are ideal for Shelter Shutters but they work just as well on doors that are all wood or aluminum. Steel strike plates come in several different shapes and sizes in both "stick on" or "screw on" styles. The strike plates are applied to the door aligned with the embedded magnets in the working section of the shutter.

KEY FEATURES

- Easy to measure and install
- Made to fit most door glass shapes and sizes
- Weighs only ounces and installs securely with pressure tape
- Holds secure to the door in both open and closed positions
- Opens and closes quickly
- ADA Accessible
- Fire Rated NFPA 701, ASTM E84, UL 723: Class I or A
- Impact and tear resistant
- High compressive strength over 96 psi
- Highest quality neodymium magnets are embedded and tamper proof
- Highest quality adhesives are used for installation of shutters and steel plates
